

PROFESSIONAL SUMMARY

I'm Banji, to be honest, I'm really glad you made it here. I'm a Software Engineer and Computer Science graduate (B.Sc., Second Class Upper) who started programming in 2023—picking up HTML, Python, and Django through self-study, documentation, and hands-on projects before moving into backend systems with Go (Golang). During my Backend Developer internship at Renda Africa, I focused on concurrency, scalability, and RESTful API architecture, applying those foundations to build full-stack web applications with React, TypeScript, MongoDB, and Firebase.

Today, alongside building software products, I work with Brookes Automation producing commercial and programmatic video content. Discovering code-driven video led me to Remotion and HyperFrames, where I combine web technologies (HTML, CSS, GSAP, and React) with AI workflows to build animated product demos and visual stories.

PROFESSIONAL EXPERIENCE

Software Engineer & Motion/Video Producer
Brookes Automation
Jan 2026 – Present | Remote
Company LinkedIn

- Supported digital marketing efforts by producing commercial video content and motion graphics designed to strengthen brand visibility, communicate technical offerings, and drive audience engagement across online platforms.
- Applied programmatic video workflows (using Remotion, HyperFrames, and AI-assisted video tools) alongside 2D/3D motion design to create animated product demos and visual communications.

Backend Developer Intern
Renda Africa
Apr 2025 – Sept 2025
Ilupeju, Lagos (Hybrid)

- Built and tested RESTful backend APIs in Go (Golang), implementing concurrency, authentication workflows, and endpoint validation using Postman under senior mentorship.
- Applied backend architecture principles to develop an independent full-stack car-wash booking application (Queueless Car Wash) from service requirements to working software.

Olabanji Ojo

Software Engineer | 2D/3D Motion & Commercial Video Editor

CONTACT INFORMATION

Location:
Lagos / Owode, Oyo State, Nigeria

TECHNICAL SKILLS

Languages
Go (Golang), Python, TypeScript, JavaScript, HTML5, CSS3

Frontend Development
React, HTMX, Tailwind CSS, Responsive Web Design

Backend & APIs
Go (Gorilla Mux), Django, RESTful APIs, Authentication, Concurrency

Databases & Caching
MongoDB, MySQL, Firebase, Redis

Integrations & Tools
Paystack, Flutterwave, OpenAI Whisper, Mapbox, Git, GitHub, Postman, Docker, Vercel

Programmatic Video & Motion
Remotion, HyperFrames, 2D/3D Motion Design, Video Editing & Codecs

SELECTED PROJECTS

Tailor's Voice
AI Tailoring System
tailor-measurement.vercel.app

Stack: Go, Gorilla Mux, React, TypeScript, Tailwind CSS, OpenAI Whisper, Redis

- Built a voice-powered tailoring measurement web app using OpenAI Whisper to parse spoken client measurements into structured fitting profiles, backed by a Go/Gorilla Mux API and Redis caching.

Queueless Car Wash
Service Booking Platform
queueless.online

Stack: Go, Gorilla Mux, React, TypeScript, MongoDB, Redis, Mapbox

- Developed an on-demand car-wash booking platform featuring Mapbox station discovery, real-time queue state via Redis, and persistent slot reservations powered by a Go and MongoDB REST API.

Frontend Study Track
EdTech Analytics Platform
frontend-study-track.vercel.app

Stack: Go, React, TypeScript, MongoDB

- Built a full-stack student and educator tracking dashboard with syllabus progression, assignment milestone tracking, and learning velocity analytics using Go, MongoDB, React, and TypeScript.

Bomffa Store
E-Commerce Storefront
bomffa.store

Stack: React, JavaScript, Firebase, Paystack, CSS

- Developed a retail e-commerce storefront featuring dynamic catalog filtering, shopping cart state, real-time inventory in Firebase, and Paystack checkout integration.

Good Things Co.
Gift E-Commerce Platform
goodthingsco.vercel.app

Stack: React, TypeScript, Firebase, Flutterwave, Tailwind CSS

- Built a lifestyle and gift-shopping storefront with persistent cart and wishlist functionality, real-time Firebase stock tracking, and multi-currency Flutterwave payment checkout.

EDUCATION

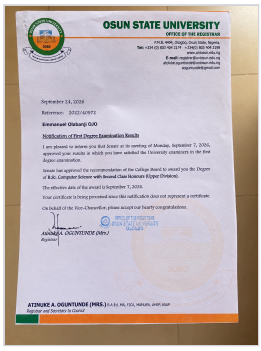

Osun State University

Nov 2022 – Sept 2026

B.Sc. Computer Science

Second Class Honours (Upper Division) — Osogbo, Osun State, Nigeria.

Focused on software engineering, algorithms, database systems, and full-stack web application development.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

CPN Nigeria

Issued Sept 21, 2026

Cert No.: GM/004211/2026

Graduate Member (GMCPN) — Computer Professionals (Registration Council of Nigeria).

Authorised to practice the computing profession within the Federal Republic of Nigeria.
